Detailed Description

ConfigurationInterface class

Member Function Documentation

```
def render.lkc_gtk.ConfigurationInterface.callback_set_finished ( self )
```

Updates the progress bar when it is up and closes the window

```
def render.lkc_gtk.ConfigurationInterface.callback_set_progress ( self,  
                                                                    progress  
                                                                    )
```

Updates the progress bar while it increases
